

# CERVICAL ROTATING BIOPSY PUNCH

The Cervical Rotating Biopsy Punch is designed for obtaining Cervical Biopsies during gynecological procedures.

## PRODUCT INFORMATION

- Latest generation top jaw is stronger than titanium allowing up to two biopsies to be taken from hardened cervix
- Low profile jaw provides better access to the transformation zone when migrating into the Endocervical Canal
- 360° rotation enables enhanced positioning and patient interaction
- Ensures a sharp, clean cut reducing Cervical trauma and patient discomfort
- Lightweight and ergonomic handle designed for comfort
- Improves procedure quality, patient safety, and overall cost savings
- Ideal for busy Colposcopy Clinics, with high-quality samples taken first-time
- No reprocessing time allows clinics to meet increased demand for HPV testing
- Single-use; eliminates cross-contamination, inadequate samples, and repeat procedures
- Manufactured in the UK
